

AFRICA OIL CORP.

Report to Shareholders

March 31, 2012

AFRICA OIL CORP.
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Amounts expressed in United States dollars unless otherwise indicated)
For the three months ended March 31, 2012 and 2011

Management's discussion and analysis ("MD&A") focuses on significant factors that have affected Africa Oil Corp. and its subsidiaries (the "Company" or "AOC") and such factors that may affect its future performance. In order to better understand the MD&A, it should be read in conjunction with the Company's unaudited interim consolidated financial statements for the three months ended March 31, 2012 and 2011 and should also be read in conjunction with the audited consolidated financial statements for the years ended December 31, 2011 and 2010 and related notes thereto.

The financial information in this MD&A is derived from the Company's audited consolidated financial statements which have been prepared in United States ("U.S.") dollars, in accordance with International Financial Reporting Standard as issued by the International Accounting Standards Board.

The effective date of this MD&A is May 28, 2012.

Additional information about the Company and its business activities is available on SEDAR at www.sedar.com.

PROFILE AND STRATEGY

AOC is a Canadian-based company whose common shares are traded on the TSX Venture Exchange and the First North list of the NASDAQ OMX Stock Exchange in Sweden under the symbol "AOI". The Company is an international oil and gas exploration and development company, based in Canada, with oil and gas interests in Kenya, Ethiopia, Puntland (Somalia), and Mali.

AOC's long range plan is to increase shareholder value through the acquisition and exploration of oil and gas assets, located in under-explored geographic areas, in the early phase of the upstream oil and gas life-cycle. The Company is focused on high-impact exploration opportunities and has secured a portfolio of primarily East African oil and gas assets which provide the shareholders exposure to multiple identified prospects and leads, geographically and geologically diversified across multiple countries and four under-explored petroleum systems. AOC's mission is to de-risk this portfolio of oil and gas prospects and leads, while generating additional prospects and leads, through continuous oil and gas exploration activities. The Company is pursuing a farmout strategy aiming to leverage the current working interest holdings in each of its operated blocks. AOC aims to continue to identify additional highly prospective exploration targets in geologically favorable settings. The Company will continue to consider acquisition and merger opportunities with a focus on North Africa and the Middle East. In general, AOC will continue its portfolio approach to exploring a large number of oil and gas opportunities with the goal of increasing shareholder value.

The Company has acquired and commenced exploration activities on multiple exploration Blocks in East Africa (refer to table below). The Company announced its first oil discovery during the first quarter of 2012 on Block 10BB with the drilling of the Ngamia exploration well. The East African Rift Basin system is one of the last great rift basins to be explored. The Company acquired its interests in East Africa as several multi-billion barrel oil fields had been discovered in multiple analogous oil fields on all sides of the Company's underexplored land position including the major Tullow Oil plc Albert Graben oil discovery in neighboring Uganda. Similar to the Albert Graben play model, the Company's concessions have older wells, a legacy database, and host numerous oil seeps indicating a proven petroleum system. Good quality existing seismic show robust leads and prospects throughout AOC's project areas. The Company now holds exploration acreage of over 300,000 km² (gross) in this exciting new world-class exploration play fairway. The Company aims to have completed significant seismic and drilling programs on the majority of the Company's blocks over the next two years. East Africa is a vastly under-explored region

where renewed interest is being shown by a growing number of mid to large sized oil companies wishing to add to their exploration portfolios.

WORKING INTERESTS

The following table summarizes the Company's net working interests in the various production sharing contracts/agreements, based on working interest ownership:

Country	Block/ Area	December 31, 2011 Net Working Interest % ⁽¹⁾	March 31, 2012 Net Working Interest % ⁽¹⁾
Kenya	Block 10A	30%	30%
Kenya	Block 9	100.0%	100.0%
Kenya	Block 10BB	50%	50%
Kenya	Block 12A	50%	50%
Kenya	Block 13T	50%	50%
Kenya	Block 10BA	50%	50%
Ethiopia	Blocks 7/8	55%	55%
Ethiopia	Adigala	50%	50%
Ethiopia	South Omo	30%	30%
Mali	Block 7	25%	25%
Mali	Block 11	25%	25%
Puntland, Somalia	Dharoor Valley	31% ⁽³⁾	31% ⁽³⁾
Puntland, Somalia	Nugaal Valley ⁽²⁾	31% ⁽³⁾	31% ⁽³⁾

Footnotes:

¹ Net Working Interests are subject to back-in rights or carried working interests, if any, of the respective governments or national oil companies of the host governments.

² Nugaal Valley net working interest is subject to AOC fulfilling its sole funding obligation during the exploration period (see Commitments and Contingencies section below).

³ Represents AOC's Net Working Interest subsequent to the formation of Horn Petroleum Corp. ("Horn"). AOC owns approximately 51.3% of Horn. This figure represents the Company's Net Working Interest in the production sharing agreements, net of the 48.7% minority interest in the new company. AOC plans to participate in Horn's private placement announced in May of 2012. It is anticipated that AOC will acquire one-third or less of this private placement which, upon completion, will result in a dilution of AOC's ownership interest in Horn.

OPERATIONS UPDATE

A two rig drilling program commenced during the first quarter of 2012 with two wells spud. In Block 10BB (Kenya), the Company discovered over 100 meters of net oil pay in Ngamia-1, the first Tullow-Africa Oil joint venture exploration well to be spud. In the Dharoor Block (Puntland (Somalia)), the Company announced that the Shabeel-1 well has completed drilling and petrophysical analysis indicates a potential net pay zone of 12 to 20 meters in the Upper Cretaceous Jesomma Formation and an additional potential 3 meters of net pay in the Jurassic Adigrat Formation. Additional details are provided below.

It is anticipated that two additional drilling rigs will be secured and mobilized into the Company's areas of operation during the second half of 2012, bringing the total number of rigs in operation to four before the end of the year. It is anticipated that one additional rig will be utilized in Ethiopia and one additional rig will be utilized in Kenya. In addition to the Shabeel-1 and Ngamia-1 wells, which have completed drilling or are in the process of being drilled, four additional wells are currently planned: the Twiga-1 well in Block 13T (Kenya), the Paipai-1 well in Block 10A (Kenya), the Shabeel North well in the Dharoor Block (Puntland (Somalia)), and an additional exploration well in the South Omo Block (Ethiopia). The

Company will also continue to actively acquire, process and interpret 2D seismic over Blocks 10BA, 10BB, 12A, 13T and South Omo.

KENYA

The Company and Tullow, its operating partner in each of the Kenyan Blocks other than Block 9, are actively exploring for oil as described below.

Block 10BB

The Company and its operating partner on the Block, Tullow, spudded the partnership's first well, Ngamia-1, on January 24, 2012. The Ngamia-1 exploration well in Kenya has now been deepened to a total depth of approximately 1940 meters. The well has encountered in excess of 100 meters of net oil pay in multiple reservoir zones over a gross interval of 650 meters of the upper Lokhone sandstone (855 meters to 1500 meters). The reservoirs in these sections are composed of good quality Tertiary age sandstones. Moveable oil with an API greater than 30 degrees has been recovered to surface from four representative intervals. This oil has similar properties to the light waxy crude which has been discovered in Uganda by Tullow. Plans are in place for at least two drill stem tests upon completion of drilling operations. The Ngamia-1 well is now being drilled to a depth of approximately 2,700 meters to explore for deeper potential including the lower Lokhone sandstone which was one of the primary objectives of this well. The Ngamia-1 well has encountered additional oil and gas shows over a gross interval of 140 meters from a depth of 1,800 meters to 1,940 meters. The reservoirs are similar to those previously encountered at a shallower depth.

The positive results of the Ngamia-1 well have led the Company and its operating partner to accelerate the pace of exploration activities along the Ngamia-1 trend in Block 10BB and adjacent Block 13T. It is planned that one additional rig will be brought into Kenya as soon as possible and an additional 850 km of 2D seismic data will be acquired as infill across the trend which has been de-risked by the Ngamia discovery. The 2D infill seismic is to further evaluate the Ngamia discovery and adjacent prospects.

The drilling of the Ngamia-1 well satisfies the last remaining work obligation (first period) under the Block 10BB PSC.

Block 13T

Following the Ngamia discovery, the Company and its operating partner on the Block, Tullow, have focused additional efforts to better delineate the prospects along the Ngamia trend northward into Block 13T. Based upon the recently acquired 500 km of 2D seismic data, 3 prospects and 3 leads have been mapped in Block 13T. Additional 2D seismic is now being acquired in conjunction with Block 10BB to mature the leads to drillable prospects. The Company has fully satisfied its work obligations (first period) under the Block 13T PSC.

Block 10A

The Company and its operating partner on the Block, Tullow, have agreed on the location of the first exploratory well in Block 10A. The prospect to be drilled is the Paipai prospect with a proposed total depth of 4150m. Paipai-1 will test a large four-way closed structure with Cretaceous-age sandstone targets at multiple depths. As part of the accelerated exploration efforts mentioned above, the current plan is to move the Weatherford 804 rig, currently at the Ngamia-1 location, to Block 13T and an additional rig will be mobilized to Paipai-1 as soon as possible. The Paipai civil works associated with the location have been completed and sufficient materials have been purchased and mobilized to the location for drilling operations. The Paipai-1 well will complete the required work obligations (first period) under the Block 10A PSC.

Block 10BA

The Company and its operating partner on the Block, Tullow, have initiated the onshore 2D seismic program along the western shores of Lake Turkana. Approximately 17% of the 1350 km of planned 2D

seismic have thus far been acquired. The offshore and nearshore portions of the 2D program will commence in July of this year. The 2D seismic program will fulfill the work obligations (first period) under the Block 10BA PSC.

Block 12A

Based upon the recently acquired FTG survey, the Company and its operating partner on the Block, Tullow have identified a primary area of interest, the Kerio Valley in the southwestern portion of the block where a 500km 2D seismic acquisition program will be focused. The seismic crew in Block 13T is expected mobilize to Block 12A in the second half of 2012 upon completion of seismic in Block 13T. The 500km 2D seismic program will satisfy the work obligations (first period) under the Block 12A PSC.

Block 9

The Company holds a 100% interest and acts as the operator in Block 9 where a major new seismic acquisition program of 750 km was completed in 2011. The new data was acquired over the Kaisut sub-basin in northwestern Block 9. Based upon the new data set, several large prospects have been mapped and resources have been estimated. The Company is currently discussing farmout opportunities on this block to bring in one to two partners. One exploration well is expected to be drilled during 2013, which will satisfy the remaining work obligations (second period) under the Block 9 PSC.

Ethiopia

South Omo Block

The Company and its operating partner on the Block, Tullow, have completed approximately 80% of a 1000 km 2D seismic program in the western portion of the South Omo Block. The recently acquired FTG data over the South Omo Block was used extensively to lay out the new seismic program. A number of very interesting leads have thus far been identified and an infill seismic program was partially acquired to mature these leads to drillable prospects. The onset of the rainy season in May has suspended this infill program which is planned recommence late in the second quarter of 2012. An additional 500 km of 2D seismic is currently under review in the eastern portion of the South Omo Block (Chew B'hir Basin) in the second half of 2012. One exploratory well is planned in the block before the end of 2012, which will satisfy the remaining work obligations (first period) under the South Omo PSA.

Ogaden Blocks 7/8

The Company and its partners continue their focus on the El Kuran oil accumulation in Block 8, discovered in the early 1970's. The Company has completed a second phase reservoir characterization study over the El Kuran structure and an economic evaluation. The Company is currently analyzing the economic feasibility of re-drilling and testing the El Kuran structure in hopes of proving up movable, commercial quantities of oil and gas. Additionally, the Company is evaluating recently received tenders for the drilling and third party services for one well on El Kuran.

Adigala Block

The Company and its partner have entered the second exploration period for the Adigala Block following successful negotiations with the Ethiopian Ministry of Mines to alter the PSA work obligations. During the first quarter of 2012, the Company completed an airborne FTG survey, the key work obligation in the amended PSA. Geologic fieldwork was completed in February of this year with a focus on critical outcrops along the periphery of the sedimentary basin. 2D seismic data acquired in 2009 is being reprocessed in hopes of improving the data quality.

Rift Valley Joint Study Block

The Company completed the acquisition of high resolution gravity and magnetic data over the Rift Valley Block. The block is on trend with highly prospective blocks in the Tertiary rift valley such as Ethiopian South Omo block, and Kenyan blocks 10BA, 10BB, 13T, and 12A. The Company has submitted an application to convert the Rift Valley Block to a formal production sharing agreement.

PUNTLAND (SOMALIA)

Dharoor and Nugaal Valley Blocks

The Shabeel-1 well has been successfully drilled, reaching a total depth of 3470 meters. Several oil and gas shows were encountered indicating the existence of a working petroleum system. The well encountered metamorphic basement at a depth of 3430 meters and has been suspended for future testing. The well encountered a 355 meter section of Upper Cretaceous sands and shales of the Jesomma Formation at a depth of approximately 1660 meters. The sands in this interval exhibited both oil and gas shows and petrophysical analysis of downhole electrical logs indicates a potential pay zone of between 12 and 20 meters in the section. Attempts to sample formation fluids using a wireline formation tester were not successful and thus the zone will require cased hole testing in the future to confirm whether they are oil bearing. In addition to potential net pay in the Jesomma Formation, the well has encountered additional potential net pay sands in the Jurassic Adigrat Formation at a depth of 3246 to 3430 meters, several of which exhibited oil and gas shows. Petrophysical analysis of the well log data indicates up to 3 meters of potential hydrocarbon pay in several thin sand units. These sands do not warrant testing at this time, but do further indicate the existence of a working petroleum system.

The rig will now move to the Shabeel-North location, which is located 3.5 kilometers north of the Shabeel-1 location. The Shabeel-North drilling site construction has been completed. The primary objective of this well will be to evaluate the Upper Cretaceous Jesomma Sands which appear to be oil bearing at the Shabeel-1 location. Subsequent to the drilling and potential testing of this well, it is the intention of the Company to return to the Shabeel-1 well and test the Jesomma sands once the necessary testing equipment has been mobilized into the country. A surface geochemical survey is being finalized for implementation in the Nugaal Valley Block in the second half of 2012.

A surface geochemical survey is being finalized for implementation in the Nugaal Valley Block in the second half of 2012.

MALI

Blocks 7 and 11

Recent security issues in Mali are being closely monitored, but currently the operational areas are not accessible. The Company's share of costs for initial seismic and the drilling of the first exploratory well are fully carried by its single partner and Operator, Heritage. During the three months ended March 31, 2012, the Company has written-off \$3.1M of capitalized intangible exploration assets due to security concerns in Mali which has halted operations on the Company's Blocks.

RECENT DEVELOPMENTS

Exercise of Warrants

In March 2012, the remaining 6,521,601 common share purchase warrants outstanding were converted into common shares of AOC for gross proceeds of CAD \$9.8 million.

Horn Private Placement

Subsequent to March 31, 2012, the Company's subsidiary Horn will issue an aggregate of 18.75 million units at a price of CAD\$0.80 per unit for gross proceeds of up to CAD\$15 million through a non-brokered private placement. Each unit is comprised of one common share and one-half of a share purchase warrant. Each whole warrant is exercisable over a period of two years at a price of CAD\$1.20 per share. In the event that Horn's common shares trade at or above CAD\$1.50 for a period of 30 consecutive days, a forced exercise provision will come into effect. A 5% finder's fee may be payable in either cash or units on all or a portion of the private placement. AOC plans to participate in Horn's private placement. It is anticipated that AOC will acquire one-third or less of this private placement which, upon completion, will result in a dilution of AOC's ownership interest in Horn.

Net proceeds of the private placement will be used towards Horn's ongoing work program in Puntland, Somalia and for general working capital purposes. Shares issued pursuant to the private placement will be subject to a four month hold period. Horn will make commercially reasonable efforts to have the warrants posted for trading on the TSX Venture Exchange after the expiry of the hold period.

Court Proceedings

The Company is a party to two separate court proceedings in Kenya, both of which are currently working their way through the Kenyan judicial system. Both proceedings, Judicial Review Number 30 of 2010 and Judicial Review Number 1 of 2012, involve a dispute concerning the administrative process that lead to the issuance of exploration permits in respect of, amongst others, Blocks 10BA, 10BB, 12A and 13T. The primary Respondents include the Minister and the Ministry of Energy, Republic of Kenya. The Company and certain of its affiliates are named as Interested Parties; the Applicants include Interstate Petroleum Ltd. ("IPL")

A hearing in respect of Judicial Review Number 30 of 2010 was held in November 2010. The High Court in Kitale, Kenya found that the application was without merit and it was dismissed with costs. The Applicants have appealed that Ruling; concurrently, the Company is seeking to have IPL wound-up for failure to pay the costs that had been awarded against it. Hearings in respect of various preliminary matters relating to Judicial Review Number 1 of 2012 are ongoing. In due course, the Company proposes to apply to the courts to have those proceedings dismissed as frivolous. In the interim, it will vigorously defend any application made by the Applicants in either of the proceedings.

SELECTED QUARTERLY INFORMATION

During 2011, Horn was formed as a new Puntland focused exploration company. The Horn Transaction has been accounted for as an acquisition of Horn's net assets by Canmex (reverse acquisition) as AOC, the sole owner of Canmex prior to the Horn Transaction, controls Horn subsequent to the Horn Transaction. Effectively as a result of the Horn Transaction and Horn private placement, AOC through its wholly owned subsidiary acquired 51.4% of the newly formed entity. While the results of Canmex have historically been consolidated in the Company's financial statements, effective September 20, 2011, the non-controlling interest in Horn have been accounted for in the consolidated results of the Company. As the Company is in the exploration stage, no oil and gas revenue has been generated to date.

The Company's results were affected by four items occurring during the second and third quarters of 2011 for the first time:

1. The gains and losses on revaluation of marketable securities are the result of changes in the value of 10 million shares held in Encanto Potash Corp which were acquired on the acquisition of Lion. These shares were disposed of during the first quarter of 2012;
2. The gain relating to the acquisition of Lion in the second quarter of 2011 was a result of the Company acquiring net working capital and intangible exploration assets in excess of the consideration issued. The consideration paid was valued at \$21.7 million, net of AOC shares acquired, versus working capital acquired of \$20.1 million, excluding the value of AOC shares held by Lion, and the fair market value of intangible assets acquired estimated at \$5.7 million; and
3. A dilution loss was recorded on the sale of a subsidiary as a result of the Horn Transaction. In accordance with IFRS, when a reverse acquisition occurs, any excess of the fair value of the consideration paid over the value of the net assets acquired is recognized in the consolidated statement of net loss and comprehensive loss as an expense. The Company has recorded a loss on reverse acquisition of \$4.6 million as a result of the Horn Transaction.

Operating expenses

Operating expenses were relatively consistent on a quarterly basis until the fourth quarter of 2010 when they increased \$1.0 million to \$2.4 million. The increase in the fourth quarter of 2010 was due to increased compensation costs, increased listing fees associated with our listing on the NASDAQ OMX

Stock Exchange in Sweden, and increased professional fees associated with farmout activity and the Centric acquisition. Operating expenses increased a further \$0.6 million in the first quarter of 2011. This increase was due to a \$1.3 million increase in stock-based compensation costs associated with stock options granted in the first quarter of 2011, partially offset by a reduction in professional fees and listing fees from elevated levels experienced in the fourth quarter of 2010. The \$5.5 million increase in operating expenses from the first quarter of 2011 to the second quarter of 2011 is due to a \$7.0 million impairment of intangible exploration assets due to AOC relinquishing Blocks 2/6 in Ethiopia offset partially by a reduction in stock-based compensation costs. The \$5.6 million decrease from the second quarter to the third quarter of 2011 can be attributed to the Block 2/6 impairment in the second quarter of 2011 offset partially by increased stock-based compensation costs associated with stock option grants in Horn, as well as professional fees and listing fees associated with the Horn Transaction. The \$0.9 million increase from the third quarter to the fourth quarter of 2011 can be attributed to increased stock-based compensation costs associated with AOC stock option grants in the quarter and a \$0.4 million donation made by Horn to the Lundin Foundation, a registered Canadian non-profit organization that provides grants and risk capital to organizations dedicated to alleviating poverty in developing countries. The \$0.9 million increase from the fourth quarter of 2011 to the first quarter of 2012 can be attributed to a \$3.1 million impairment of intangible exploration assets in Mali offset partially by decreased stock-based compensation, a donation made by Horn to the Lundin Foundation in the fourth quarter of 2011, and a reduction in professional fees from the fourth quarter of 2011 associated with a reduction in transaction related professional fees.

Interest income

Interest income increased in the first quarter of 2011 due to a significant increase in cash late in the fourth quarter of 2010 as a result of cash received on the exercise of warrants. The reduction in interest income from the fourth quarter of 2011 to the first quarter of 2012 can be attributed to a lower yield for cash held on deposit.

Foreign exchange gains and losses

The foreign exchange gains and losses are the direct result of changes in the value of the Canadian dollar in comparison to the US dollar. The Company has been holding large Canadian dollar cash balances as the result of Horn's private placement, cash acquired on the Lion acquisition and warrant exercises at the end of 2010. The Company has recorded foreign exchange gains when the Canadian dollar has strengthened versus the US dollar, and has recorded losses when the Canadian dollar has weakened versus the US dollar.

Fair market value adjustments – warrants and convertible debenture

The fair market value adjustments to warrants and convertible debt are performed on a quarterly basis. The warrants entitle the holder to acquire a fixed number of common shares for a fixed Canadian dollar price per share. The convertible debenture entitled the holder to convert the US dollar denominated loan into common shares for a fixed Canadian dollar price per share. In accordance with IFRS, an obligation to issue shares for a price that is not fixed in the company's functional currency (US dollar for AOC), and that does not qualify as a rights offering, must be classified as a derivative liability and measured at fair value with changes recognized in the statement of operations as they arise.

During the second quarter of 2011, the convertible debenture was fully repaid. Accordingly, fair market value gains or losses relating to the convertible debenture have not been incurred since the second quarter of 2011.

At March 31, 2012, nil warrants were outstanding in AOC and 45.5 million warrants were outstanding in Horn. AOC holds 11.1 million of the warrants outstanding in Horn. The Company incurred a \$27.4 million loss on the revaluation of warrants due to a significant increase in the share price of Horn from December 31, 2011 to March 31, 2012. The Company will incur fair market value adjustments on the Horn warrants until they are exercised or they expire (33,572 expire October 12, 2012, 45,535,195 expire September 20, 2013).

RESULTS OF OPERATIONS

For the three months ended	March 31, 2012	March 31, 2011
Salaries and benefits	\$ 282,688	\$ 436,617
Stock-based compensation	629,596	1,456,226
Bank charges	8,208	99,388
Travel	224,773	136,652
Management fees	64,166	64,122
Office and general	142,820	413,059
Depreciation	11,906	14,119
Professional fees	91,102	217,715
Stock exchange and filing fees	127,306	151,444
Impairment of intangible exploration assets	3,114,858	-
Operating expenses	\$ 4,697,423	\$ 2,989,342

Operating expenses increased \$1.7 million for the three months ended March 31, 2012 compared to the same period in the previous year due to a \$3.1 million impairment of intangible exploration assets relating to Blocks 7 and 11 in Mali, offset partially by a \$0.8 million decrease in stock-based compensation costs associated, decreased salary costs associated with a moving allowance paid in the first quarter of 2011, and professional fees associated with the acquisition of Centric and the Tullow farmout in the first quarter of 2011. Of the \$0.6 million stock-based compensation expense in the year, \$0.2 million relates to stock-based compensation expense of Horn.

INTANGIBLE EXPLORATION ASSETS

	March 31, 2012	December 31, 2011
Intangible exploration assets	\$204,452,752	\$185,671,962

During the three months ended March 31, 2012, AOC increased its investment in intangible exploration assets by \$18.8 million.

AOC incurred \$11.8 million of intangible exploration expenditures in Kenya in the first quarter of 2012. The majority of expenditures related to the Company's portion of drilling costs on the Ngamia-1 well (Block 10BB) and 2D seismic costs on Block 13T. Of the \$11.8 million expenditures in Kenya, \$1.1 million related the Company's portion of PSA related costs and general and administrative costs. AOC incurred \$7.5 million of intangible exploration expenditures in Puntland in the first quarter of 2012. The majority of expenditures related to an exploratory well at the Shabeel-1 location and preparation for drilling a second location, Shabeel-North. Of the \$7.5 million expenditures in Puntland, \$1.7 million related the Company's portion of PSA related costs and general and administrative costs. AOC incurred \$2.7 million of intangible exploration expenditures in Ethiopia in the first quarter of 2012. The majority of expenditures related to the Company's portion of a 2D seismic acquisition program in South Omo. Of the \$2.7 million expenditures in Ethiopia, \$0.4 million related the Company's portion of PSA related costs and general and administrative costs. Intangible exploration assets will not be subject to depletion until such time that proved oil and gas reserves are identified.

During the three months ended March 31, 2012, management identified indicators of impairment for intangible exploration assets in Mali. As a result of the assessment of these impairment indicators, the Company has written-off \$3.1M of capitalized intangible exploration assets. The remaining carrying value of the Mali intangible exploration assets is nil.

LIQUIDITY AND CAPITAL RESOURCES

As at March 31, 2012, the Company had cash of \$104.1 million and working capital of \$82.2 million as compared to cash of \$109.6 million and working capital of \$90.2 million at December 31, 2011. Of the \$109.6 million in cash at December 31, 2011, \$21.0 million is cash held by Horn. The Company's liquidity and capital resource position has remained strong throughout the first quarter of 2012. Working capital decreased compared to year end due mainly to intangible explorations expenditures.

The Company's current working capital position is anticipated to provide it with sufficient capital resources to fulfill its share of 2012 approved work programs and budgets. The Company's current working capital position is not anticipated to provide it with sufficient capital resources to meet its minimum work obligations for all exploration periods under the various PSAs and PSCs, the accelerated exploration and appraisal program which is anticipated following the Ngamia discovery in Block 10BB and for general corporate purposes. To finance its future acquisition, exploration, development and operating costs, AOC may require financing from external sources, including issuance of new shares, issuance of debt or executing working interest farmout or disposition arrangements. The Company is actively marketing the opportunity for interested parties to farm in to its operated oil and gas concessions in East Africa. There can be no assurance that such financing will be available to the Company or, if available, that it will be offered on terms acceptable to AOC.

STOCK-BASED COMPENSATION

The Company uses the fair value method of accounting for stock options granted to directors, officers, consultants and employees whereby the fair value of all stock options granted is recorded as a charge to operations. Stock-based compensation for the three months ended March 31, 2012 was \$0.6 million as compared to \$1.5 million for the same period in 2011. The decrease can be attributed to 3.1 million options granted by AOC in the first quarter of 2011 of which one-third vested immediately. Of the \$0.6 million stock-based compensation expense in the year, \$0.2 million relates to stock-based compensation expense of Horn. The Company continues to utilize its stock option plan as a method of recruiting, retaining and motivating personnel.

RELATED PARTY TRANSACTIONS

Transactions with Lorito Holdings (Guernsey) Limited ("Lorito")

During May 2009, the Company's loans payable due to Lorito in the amount of CAD\$6,000,000 plus interest of \$195,521 was converted to 6,521,601 Units of the Company on the basis of CAD\$0.95 per Unit. Each Unit was comprised of one common share and one share purchase warrant. Each warrant is exercisable into one common share of AOC at a price of CAD\$1.50 per share over a period of three years. In the event that AOC closes at or above CAD\$2.00 for a period of 20 consecutive trading days, the Company may elect to accelerate the expiry date to 30 days from the date of written notice to the warrant holder. Lorito is beneficially owned by Ellegrove Capital Ltd., a private trust the settler of which is the late Adolf H. Lundin. During the quarter, Lorito exercised each of its 6,521,601 warrants into a common share of the Company.

Transactions with Namdo Management Services Ltd ("Namdo")

During the three months ended March 31, 2012, the Company incurred management fees of \$64,164 (three months ended March 31, 2011- \$64,122) for administrative support services fees to Namdo. Namdo is a private corporation owned by Lukas H. Lundin. At March 31, 2012, the Company had no outstanding amounts due to Namdo in respect of management fees (December 31, 2011 – Nil).

Transactions with Horn Petroleum Corp. ("Horn")

On September 20, 2011, a Share Purchase Agreement was executed between the Company and Horn. AOC owns 51.3% of the outstanding shares of Horn. The following transactions and resulting intercompany balances outstanding between the Company and Horn have been eliminated as the Company fully consolidates the financial statements of Horn.

Under the terms of a General Management and Service Agreement between Horn and the Company for the provision of management and administrative services, the Company invoiced Horn \$224,423 during three months ended March 31, 2012 (three months ended March 31, 2011 – Nil). At March 31, 2012, the outstanding balance receivable from Horn, recorded as a due from related party, was nil (December 31, 2011 – \$258,116). The management fee charged to Horn by the Company is expected to cover the cost of administrative expense and salary costs paid by the Company in respect services provided to Horn.

Under the terms of a Services Agreement between the Company and Horn, AOC invoiced Horn \$63,246 during the three months ended March 31, 2012 (three months ended March 31, 2011 – \$76,398) for services provided by geologists and geophysicists employed by AOC. At March 31, 2012, \$24,936 was outstanding and recorded in due from related party (December 31, 2011 – \$11,650).

During the three months ended March 31, 2012, AOC invoiced Horn \$108,032 for reimbursable expenses paid by AOC on behalf of Horn (three months ended March 31, 2011 – \$136,305). At March 31, 2012, \$49,951 was outstanding and recorded in due from related party (December 31, 2011 – \$109,269).

During December 2011, Horn's subsidiary Canmex Holdings (Bermuda) II Ltd. commenced the transfer of \$1.5 million to Horn, via AOC. At December 31, 2011, the funds were on deposit with AOC. Accordingly, the balance has been recorded as due to related party. During the quarter, AOC transferred the funds to Horn.

COMMITMENTS AND CONTINGENCIES

Please note that the following commitments and contingencies are representative of AOC's net obligations at the effective date of the MD&A.

Ethiopia:

Under the terms of the Blocks 7/8 PSA, during the initial exploration period which expires in July 2012, the Company and its partners are obligated to complete certain geological and geophysical ("G&G") operations (including acquisition of 1,250 kilometers of 2D seismic) with a minimum gross expenditure of \$11.0 million. In addition, the Company and its partners are required to drill one exploration well with a minimum gross expenditure of \$6.0 million. The Company has applied for a one year extension to the expiry date of the initial exploration period. The Company's current working interest in Blocks 7/8 is 55%; however, the Company's portion of minimum expenditures is expected to be less than its working interest due to the terms of farmout agreements which require AOC's joint venture partners to pay a disproportionate share of joint venture costs.

Under the terms of the Adigala Block PSA, AOC and its partners have fulfilled the minimum work and financial obligations of the initial four year exploration period which expired in July 2011. The Ministry of Mines in Ethiopia approved the Company and its partners' entry into the next exploration period with amended minimum work commitments. Under the PSA which expires in July 2013, AOC and its partners are obligated to complete certain geological and geophysical ("G&G") operations (including acquisition of 7,500 kilometers of full tensor gravity) with a minimum gross expenditure of \$1.75 million.

Under the terms of the South Omo PSA, during the initial exploration period which was extended by the Ministry of Mines in Ethiopia and expires in January 2013, AOC and its partners are obligated to complete certain G&G operations (including acquisition of 400 kilometers of 2D seismic) with a minimum gross expenditure of \$6.0 million. Additionally, AOC and its partners are required to drill one exploration well with a minimum gross expenditure of \$8.0 million. The Company's current working interest in the South Omo Block is 30%; however, the Company's portion of minimum expenditures is expected to be less than its working interest due to the terms of farmout agreements which require AOC's joint venture partners to pay a disproportionate share of joint venture costs. This commitment is supported by an outstanding letter of credit of \$294,000 in favor of Tullow Oil plc ("Tullow") which is collateralized by a bank deposit of \$294,000.

Kenya:

Under the terms of the Block 10A PSC, during the initial exploration period which was extended by the Ministry of Energy for the Republic of Kenya and expires in October 2012, AOC and its partners are obligated to complete G&G operations (including acquisition of 750 kilometers of 2D seismic) with a minimum gross expenditure of \$7.8 million. Additionally, AOC and its partners are obligated to drill one exploration well with a minimum expenditure of \$8.5 million. The Company's current working interest in Block 10A is 30%.

Under the terms of the Block 10BB PSC, during the initial exploration period which was extended by the Ministry of Energy for the Republic of Kenya and expires in July 2012, the Company and its partners are obligated to complete G&G operations (including acquisition of 600 kilometers of 2D seismic) with a minimum gross expenditure of \$6.0 million. Additionally, AOC and its partners are required to drill one exploration well with a minimum gross expenditure of \$6.0 million. The Company's current working interest in Block 10BB is 50%. This commitment is supported by an outstanding bank guarantee of \$0.9 million in favor of Tullow which is collateralized by a bank deposit of \$0.9 million.

Under the terms of the Block 9 PSC, with the drilling of the Bogal-1-1 well, AOC and its partners have fulfilled and exceeded the minimum work and financial obligations of the initial exploration period. Effective December 31, 2010, the Company entered into the First Additional Exploration Phase under the Block 9 PSC in Kenya which will expire on December 31, 2013. Under the terms of the PSC, AOC and its partners are required to drill one additional exploratory well to a minimum depth of 1,500 meters per well with a minimum gross expenditure of \$2.5 million. The Company's current working interest in Block 9 is 100%.

Under the terms of the Blocks 12A and 13T PSCs, during the initial exploration periods which were extended by the Ministry of Energy for the Republic of Kenya and expire in September 2012, the initial minimum gross exploration expenditures are \$3.6 million (Block 12A) and \$3.65 million (Block 13T). The Company and its partner are obligated to complete G&G operations including the acquisition of 500km of 2D seismic or 100 km² of 3D seismic (or a combination thereof) on each block. The Company's current working interest in Blocks 12A and 13T is 50%.

Under the terms of the Block 10BA PSC, during the initial exploration period which expires in April 2013, the Company and its partners are obligated to complete G&G operations (including acquisition of 200 kilometers of 2D seismic) with a minimum expenditure of \$3.0 million. The Company's current working interest in Block 10BA is 50%; however, the Company's portion of minimum expenditures is expected to be less than its working interest due to the terms of the farmout agreement with Tullow which require AOC's joint venture partner to pay a disproportionate share of joint venture costs. The commitments on Block 10BA are supported by an outstanding letter of credit of \$450,000 in favor of the Kenyan Government which is collateralized by bank deposit of \$450,000.

Mali:

Under the terms of the Block 7 and 11 PSCs, the current exploration periods expire in July 2012 and June 2014, respectively. In accordance with the terms of the PSCs, the minimum gross exploration expenditures in the current exploration periods are \$11.6 million (Block 7) and \$8.0 million (Block 11). In exchange for 75% working interest, our partner has committed to funding all planned seismic, G&G, and drilling costs associated with both blocks.

Puntland (Somalia):

Under the terms of the Dharoor Valley and Nugaal Valley PSAs, during the initial exploration periods which were extended by the Puntland Petroleum and Mineral Agency (PPMA) and expire October 17, 2012, the Company, at its option, must drill one exploratory well in each of the Dharoor Valley and Nugaal Valley Exploration Areas, or two exploratory wells in the Dharoor Valley Block by the date of expiration. In consideration for the extensions of the exploration periods, the Company agreed to pay the PPMA a \$1 million bonus within 30 days of a commercial discovery in each of the exploration blocks, to relinquish surface area on each of the exploration blocks, to take certain enhanced abandonment and environmental safety measures, to perform a surface geochemistry survey in the Nugaal Valley Exploration area and to make \$2.05 million of payments to the PPMA for development of infrastructure (\$250,000 paid in the first quarter of 2012 with the remainder paid prior to 2012).

Under the Joint Venture Agreement with Range Resources Ltd. ("Range"), relating to the Dharoor Valley and Nugaal Valley Exploration Blocks, the Company is obligated to solely fund \$22.8 million of joint venture costs on each of the blocks (\$45.5 million in total for both blocks) during the exploration period, in exchange for a 80% working interest in each block. In the event that a commercial discovery is declared on either of the Dharoor Valley and Nugaal Valley Blocks prior to the Company spending \$22.8 million on that block, the Company shall be deemed to have earned its interest in that block and the Company and Range will be responsible for future expenditures on the block in proportion to their respective working interests. In the event that the Company does not fund the required \$22.8 million during the initial exploration period, the Company's interest in the block would be forfeited. An additional \$3.5 million will be payable to Range upon commencement of commercial production.

The Company has fulfilled its sole funding obligation related to the Dharoor Valley Block, and as a result, Range is paying its 20% participating interest share of ongoing exploration costs related to this Block. In the Nugaal Valley Block, the Company has spent approximately \$9.7 million towards its sole funding obligation to Range as of March 31, 2012.

OUTSTANDING SHARE DATA

The following table outlines the maximum potential impact of share dilution upon full execution of outstanding convertible instruments as at the effective date of the MD&A:

Common shares outstanding	218,664,492
Outstanding share purchase options	10,023,502
Full dilution impact on common share outstanding	228,687,994

There were no changes to common shares and share purchase options subsequent to March 31, 2012.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements.

CRITICAL ACCOUNTING ESTIMATES

The Company's critical accounting estimates are defined as those estimates that have a significant impact on the portrayal of its financial position and operations and that require management to make judgments, assumptions and estimates in the application of IFRS. Judgments, assumptions and estimates are based on historical experience and other factors that management believes to be reasonable under current conditions. As events occur and additional information is obtained, these judgments, assumptions and estimates may be subject to change. The Company believes the following are the critical accounting estimates used in the preparation of its consolidated financial statements. The Company's significant accounting policies can be found in note 3 of the Company's Financial Statements.

Use of Estimates

The preparation of the consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Such estimates related to unsettled transactions and events as of the date of the consolidated financial statements. Accordingly, actual results may differ from these estimated amounts as future confirming events occur. Significant estimates used in the preparation of the consolidated financial statements include, but are not limited to, recovery of exploration costs capitalized in accordance with IFRS, stock-based compensation, income taxes and fair market value of warrants and convertible debentures.

Intangible Explorations Assets

The Company capitalizes costs related to the acquisition of a license interest, directly attributable general and administrative costs, expenditures incurred in the process of determining oil and gas exploration targets, and exploration drilling costs. All exploration expenditures are capitalized on a license-by-license basis within intangible exploration assets. Costs are held un-depleted until such time as the exploration phases on the license area are complete or commercially viable reserves have been discovered and extraction of those reserves is determined to be technically feasible. The determination that a discovery is commercially viable and extraction is technically feasible requires judgment.

Where results of exploration drilling indicate the presence of hydrocarbons which are ultimately not considered commercially viable, all related costs are recognized in the statement of operations. If commercial reserves are established and technical feasibility for extraction demonstrated, then the related capitalized intangible exploration costs are transferred into a single field cost center within "oil and gas interests" subsequent to determining that the assets are not impaired.

Intangible exploration assets are assessed for impairment when they are reclassified to property and equipment, as oil and gas interests, and also if facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit" or "CGU"). The allocation of the company's assets into CGUs requires judgment.

The recoverable amount of an asset or a CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value

of money and the risks specific to the asset. Value in use is generally computed by reference to the present value of the future cash flows expected to be derived from production of proven and probable reserves. In determining fair value less costs to sell, recent market transactions are taken into account, if available. In the absence of such transactions, an appropriate valuation model is used.

The key assumptions the company uses for estimating future cash flows are reserves, future commodity prices, expected production volumes, future operating and development costs, among others. The estimated useful life of the CGU, the timing of future cash flows and discount rates are also important assumptions made by management.

Stock Based Compensation

The Company uses the fair value method, utilizing the Black-Scholes option pricing model, for valuing stock options granted to directors, officers, consultants and employees. The estimated fair value is recognized over the applicable vesting period as stock-based compensation expense. The recognized costs are subject to the estimation of what the ultimate payout will be using pricing models such as the Black-Scholes model which is based on significant assumptions such as volatility, dividend yield and expected term.

Warrants

An obligation to issue shares for a price that is not fixed in the company's functional currency, and that does not qualify as a rights offering, must be classified as a derivative liability and measured at fair value with changes recognized in the statement of operations as they arise. The warrants which were fully exercised in the quarter entitled the holder to acquire a fixed number of common shares for a fixed Canadian dollar price per share. The Company used the fair value method, utilizing the Black-Scholes option pricing model, for valuing the warrants. The Black-Scholes model is based on significant assumptions such as volatility, dividend yield and expected term.

Income Tax

The Company follows the balance sheet method of accounting for income taxes whereby future income taxes are recognized based on the differences between the carrying values of assets and liabilities reported in the Annual Financial Statements and their respective tax basis. Future income tax assets and liabilities are recognized at the tax rates at which Management expects the temporary differences to reverse. Management bases this expectation on future earnings, which require estimates for reserves, timing of production, crude oil price, operating cost estimates and foreign exchange rates. Management assesses, based on all available evidence, the likelihood that the future income tax assets will be recovered from future taxable income and a valuation allowance is provided to the extent that it is more than likely that future income tax assets will not be realized. As a result, future earnings are subject to significant Management judgment.

NEW ACCOUNTING PRONOUNCEMENTS AND CHANGES IN ACCOUNTING POLICIES

International Financial Reporting Standards

On January 1, 2011, the Company adopted International Financial Reporting Standards ("IFRS") for financial reporting purposes, using a transition date of January 1, 2010. The financial statements for the year ended December 31, 2011, including required comparative information, have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IASB"). Previously, the Company prepared its Interim and Annual Consolidated Financial Statements in accordance with Canadian generally accepted accounting principles ("previous GAAP"). Unless otherwise noted, 2010 comparative information has been prepared in accordance with IFRS.

The adoption of IFRS has not had an impact on the Company's operations, strategic decisions and Cash Flow.

Future Accounting Pronouncements

As of January 1, 2013, the following standards and amendments issued by the IASB become effective:

- IFRS 10, "Consolidated Financial Statements", which is the result of the IASB's project to replace Standing Interpretations Committee 12, "Consolidation – Special Purpose Entities" and the consolidation requirements of IAS 27, "Consolidated and Separate Financial Statements". The new standard eliminates the current risk and rewards approach and establishes control as the single basis for determining the consolidation of an entity.
- IFRS 11, "Joint Arrangements", which is the result of the IASB's project to replace IAS 31, "Interests in Joint Ventures". The new standard redefines joint operations and joint ventures and requires joint operations to be proportionately consolidated and joint ventures to be equity accounted. Under IAS 31, joint ventures could be proportionately consolidated.
- IFRS 12, "Disclosure of Interests in Other Entities", which outlines the required disclosures for interests in subsidiaries and joint arrangements. The new disclosures require information that will assist financial statement users to evaluate the nature, risks and financial effects associated with an entity's interests in subsidiaries and joint arrangements.
- IFRS 13, "Fair Value Measurement", which provides a common definition of fair value, establishes a framework for measuring fair value under IFRS and enhances the disclosures required for fair value measurements. The standard applies where fair value measurements are required and does not require new fair value measurements.
- IAS 19, "Employee Benefits", which amends the recognition and measurement of defined benefit pension expense and expands disclosures for all employee benefit plans.
- IFRS 7, "Financial Instruments: Disclosures", which requires disclosure of both gross and net information about financial instruments eligible for offset in the balance sheet and financial instruments subject to master netting arrangements. Concurrent with the amendments to IFRS 7, the IASB also amended IAS 32, "Financial Instruments: Presentation" to clarify the existing requirements for offsetting financial instruments in the balance sheet. The amendments to IAS 32 are effective as of January 1, 2014.

As of January 1, 2015, IFRS 9, "Financial Instruments", which is the result of the first phase of the IASB's project to replace IAS 39, "Financial Instruments: Recognition and Measurement". The new standard replaces the current multiple classification and measurement models for financial assets and liabilities with a single model that has only two classification categories: amortized cost and fair value. The impairment and hedge accounting principles to be included in IFRS 9 have not yet been issued by the IASB.

RISK FACTORS

The Company is subject to various risks and uncertainties, including, but not limited to, those listed below. Refer to the Company's Annual Information Form for further risk factor disclosures.

International Operations

AOC participates in oil and gas projects located in emerging markets, including Puntland (Somalia), Ethiopia and Kenya ("East Africa"). Oil and gas exploration, development and production activities in these emerging markets, including East Africa, are subject to significant political and economic uncertainties which may adversely affect the Company's operations. Uncertainties include, but are not limited to, the risk of war, terrorism, expropriation, nationalization, renegotiation or nullification of existing or future concessions and contracts, the imposition of international sanctions, a change in

crude oil or natural gas pricing policies, a change in taxation policies, and the imposition of currency controls. These uncertainties, all of which are beyond the Company's control, could have a material adverse effect on AOC's business, prospects and results of operations. In addition, if legal disputes arise related to oil and gas concessions acquired by the Company, AOC could be subject to the jurisdiction of courts other than those of Canada. The Company's recourse may be very limited in the event of a breach by a government or government authority of an agreement governing a concession in which AOC acquires an interest. The Company may require licenses or permits from various governmental authorities to carry out future exploration, development and production activities. There can be no assurance that AOC will be able to obtain all necessary licenses and permits when required.

International Boundary Disputes

As a result of ongoing political disputes, the legal international boundaries between Somalia (which includes Puntland, a semi-autonomous region within Somalia) and its neighbouring countries are in dispute. For instance, in September 2007, AOC was advised that the Ministry of Water and Mineral Resources of the Republic of Somaliland was claiming ownership of the Nugaal and AhlMedo Valley basins, including some or all of the areas that comprise the Puntland PSA, granted by the Government of Puntland. That claim was repeated in correspondence received by the Company in February 2012. The Republic of Somaliland and Somalia have disputed their respective borders since May 1991 when the Republic of Somaliland was established. As recently as August 2011, there have been armed confrontations at the Somalia / Somaliland border. AOC disputes the claims of the Republic of Somaliland, however, the outcome of this dispute cannot be predicted with any certainty.

Political Instability

Through Horn, the Company is highly exposed to significant political risk in Puntland (Somalia). The political climate in Puntland (Somalia) is characterized by strong internal political tension, turmoil and factional fighting. The political tensions sometimes escalate into violence or the threat of violence.

On January 31, 2009, Somalia elected a new President, President Sharif Sheikh Ahmed, who vowed to unify all factions of Somalia and bring peace to neighbouring countries. President Ahmed's mandate was scheduled to expire in mid-2011, however, the Kampala Accord, which extended the mandate for an additional 12 months, was ultimately approved by the Transitional Federal Government (the "TFG") in July 2011. Regardless, Puntland's President Farole, who opened the 26th session of the Puntland Parliament in June 2011, has repudiated the Kampala Accord and has threatened to break from the TFG, claiming it did not represent Puntland in international forums.

Through Horn, the Company continues to work and cooperate with government leaders in Somalia, however, there can be no certainty as to if, or when, the current political instability will be resolved.

Different Legal System and Litigation

AOC's oil production and exploration activities are located in countries with legal systems that in various degrees differ from that of Canada. Rules, regulations and legal principles may differ both relating to matters of substantive law and in respect of such matters as court procedure and enforcement. Almost all material production and exploration rights and related contracts of AOC are subject to the national or local laws and jurisdiction of the respective countries in which the operations are carried out. This means that AOC's ability to exercise or enforce its rights and obligations may differ between different countries and also from what would have been the case if such rights and obligations were subject to Canadian law and jurisdiction.

AOC's operations are, to a large extent, subject to various complex laws and regulations as well as detailed provisions in concessions, licenses and agreements that often involve several parties. If AOC were to become involved in legal disputes in order to defend or enforce any of its rights or obligations under such concessions, licenses, agreements or otherwise, such disputes or related litigation may be costly, time consuming and the outcome may be highly uncertain. Even if AOC would ultimately

prevail, such disputes and litigation may still have a substantially negative effect on AOC and its operations.

Financial Statements Prepared on a Going Concern Basis

AOC's financial statements have been prepared on a going concern basis under which an entity is considered to be able to realize its assets and satisfy its liabilities in the ordinary course of business. AOC's operations to date have been primarily financed by equity financing. AOC's future operations are dependent upon the identification and successful completion of additional equity or debt financing or the achievement of profitable operations. There can be no assurances that AOC will be successful in completing additional financing or achieving profitability. The consolidated financial statements do not give effect to any adjustments relating to the carrying values and classification of assets and liabilities that would be necessary should AOC be unable to continue as a going concern.

Uncertainty of Title

Although the Company conducts title reviews prior to acquiring an interest in a concession, such reviews do not guarantee or certify that an unforeseen defect in the chain of title will not arise that may call into question AOC's interest in the concession. Any uncertainty with respect to one or more of AOC's concession interests could have a material adverse effect on the Company's business, prospects and results of operations.

The Company has been made aware that previous operators in Somalia have made claims concerning areas covered by the Company's concessions. The Company believes that there is no merit to any of these claims. Accordingly, the Company proposes to proceed with its exploration and development program as previously disclosed.

Competition

The petroleum industry is intensely competitive in all aspects including the acquisition of oil and gas interests, the marketing of oil and natural gas, and acquiring or gaining access to necessary drilling and other equipment and supplies. AOC competes with numerous other companies in the search for and acquisition of prospects.

Risks Inherent in Oil and Gas Exploration and Development

AOC's business is subject to all of the risks and hazards inherent in businesses involved in the exploration for, and the acquisition, development, production and marketing of, oil and natural gas, many of which cannot be overcome even with a combination of experience and knowledge and careful evaluation. The risks and hazards typically associated with oil and gas operations include fire, explosion, blowouts, sour gas releases, pipeline ruptures and oil spills, each of which could result in substantial damage to oil and natural gas wells, production facilities, other property, the environment or personal injury.

Capital Requirements

To finance its future acquisition, exploration, development and operating costs, AOC may require financing from external sources, including from the issuance of new shares, issuance of debt or execution of working interest farm-out agreements. There can be no assurance that such financing will be available to the Company or, if available, that it will be offered on terms acceptable to AOC. If additional financing is raised through the issuance of equity or convertible debt securities, control of the Company may change and the interests of shareholders in the net assets of AOC may be diluted. If unable to secure financing on acceptable terms, AOC may have to cancel or postpone certain of its planned exploration and development activities which may ultimately lead to the Company's inability to fulfill the minimum work obligations under the terms of its various PSAs and PSCs. Availability of capital will also directly impact the Company's ability to take advantage of acquisition opportunities.

Foreign currency exchange rate risk

The Company is exposed to changes in foreign exchange rates as expenses in international subsidiaries, oil and gas expenditures, or financial instruments may fluctuate due to changes in rates. The Company's exposure is partially offset by sourcing capital projects and expenditures in US dollars. AOC had no forward exchange contracts in place as at or during the year ended March 31, 2012.

Interest rate risk

The Company does not have any current exposure to fluctuations in interest rates.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. Liquidity describes a company's ability to access cash. Companies operating in the upstream oil and gas industry, during the exploration phase, require sufficient cash in order to fulfill their work commitments in accordance with contractual obligations and to be able to potentially acquire strategic oil and gas assets.

The Company will potentially issue debt or equity and enter into farmout agreements with joint venture partners to ensure the Company has sufficient available funds to meet current and foreseeable financial requirements. The Company actively monitors its liquidity to ensure that its cash flows and working capital are adequate to support these financial obligations and the Company's capital programs. The Company will also adjust the pace of its exploration activities to manage its liquidity position.

Credit risk

Credit risk is the risk of loss if counterparties do not fulfill their contractual obligations. The majority of our credit exposure relates to amounts due from our joint venture partners. The risk of our joint venture partners defaulting on their obligations per their respective joint operating and farmout agreements is mitigated as there are contractual provisions allowing the Company to default joint venture partners who are non-performing and reacquire any previous farmed out working interests.

OUTLOOK

The Company has recently announced the discovery of over 100 meters of net oil pay in the Ngamia-1 exploration well, located in Block 10BB (Kenya). It is anticipated that drilling of the Ngamia well will be completed and test results announced early in the third quarter of 2012. Upon completion of the Ngamia well, it is anticipated that the rig will commence drilling the Twiga-1 exploration well, located on Block 13T (Kenya). The Twiga-1 well is on trend with the Ngamia well, focusing on a geologic structure similar to Ngamia.

In addition, the Company has recently announced that the Shabeel-1 well, located in the Dharoor Block (Puntland (Somalia)), has encountered a significant zone (12 – 20 meters) of potential hydrocarbon pay in the Upper Cretaceous Jesomma Formation. The Shabeel-1 well has been suspended for future testing. The drilling rig is currently being mobilized to the Shabeel-North location. It is anticipated that the Shabeel-North well will be drilled and potentially tested during the third quarter of 2012.

The Company and its joint venture partner Tullow aim to increase the pace of exploration in East Africa by sourcing an additional two drilling rigs before the end of 2012. One rig is intended to be mobilized to Block 10A (Kenya) and to commence drilling the Pai-Pai prospect and an additional rig is intended to be mobilized to the South Omo Block (Ethiopia) to commence drilling an oil exploration well. This will bring the total number of rigs operating on the Company's East African acreage to four prior to the end of 2012. In addition, the Company plans to continue aggressively acquiring 2D seismic data focused on Blocks 10BA, 10BB, 13T, South Omo and 12A.

Forward Looking Statements

Certain statements in this document are "forward-looking statements". Forward-looking statements are statements that are not historical fact and are generally identified by words such as "believes", "anticipates", "expects", "estimates", "pending", "intends", "plans" or similar words suggesting future outcomes. By their nature, forward-looking statements and information involve assumptions, inherent risks and uncertainties, many of which are difficult to predict, and are usually beyond the control of management, that could cause actual results to be materially different from those expressed by these forward-looking statements and information. Risks and uncertainties include, but are not limited to, risk with respect to general economic conditions, regulations and taxes, civil unrest, corporate restructuring and related costs, capital and operating expenses, pricing and availability of financing and currency exchange rate fluctuations. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements.

The Company does not undertake to update or re-issue the forward-looking statements and information that may be contained herein, whether as a result of new information, future events or otherwise.

Any statements regarding the following are forward-looking statements:

- expected closing dates for the completion of proposed transactions;
- planned exploration activity including both expected drilling and geological and geophysical related activities;
- anticipated future financing requirements
- future crude oil, natural gas or chemical prices;
- future sources of funding for our capital program;
- availability of potential farmout partners;
- government or other regulatory consent for exploration, development, farmout or acquisition activities;
- future production levels;
- future capital expenditures and their allocation to exploration and development activities;
- future earnings;
- future asset acquisitions or dispositions;
- future debt levels;
- availability of committed credit facilities;
- possible commerciality;
- development plans or capacity expansions;
- future ability to execute dispositions of assets or businesses;
- future sources of liquidity, cash flows and their uses;
- future drilling of new wells;
- ultimate recoverability of current and long-term assets;
- ultimate recoverability of reserves or resources;
- expected finding and development costs;
- expected operating costs;
- estimates on a per share basis;
- future foreign currency exchange rates;
- future market interest rates;
- future expenditures and future allowances relating to environmental matters;
- dates by which certain areas will be developed or will come on stream or reach expected operating capacity; and
- changes in any of the foregoing.

Statements relating to “reserves” or “resources” are forward-looking statements, as they involve the implied assessment, based on estimates and assumptions that the reserves and resources described exist in the quantities predicted or estimated, and can be profitably produced in the future.

The forward-looking statements are subject to known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements. Such factors include, among others:

- market prices for oil and gas and chemical products;
- our ability to explore, develop, produce and transport crude oil and natural gas to markets;
- ultimate effectiveness of design or design modification to facilities;
- the results of exploration and development drilling and related activities;
- volatility in energy trading markets;
- foreign-currency exchange rates;
- economic conditions in the countries and regions in which we carry on business;
- governmental actions including changes to taxes or royalties, changes in environmental and other laws and regulations;
- renegotiations of contracts;
- results of litigation, arbitration or regulatory proceedings; and
- political uncertainty, including actions by terrorists, insurgent or other groups, or other armed conflict,
- conflict between states.

The impact of any one risk, uncertainty or factor on a particular forward-looking statement is not determinable with certainty as these factors are interdependent, and management’s future course of action would depend on our assessment of all information at that time. Although we believe that the expectations conveyed by the forward-looking statements are reasonable based on information available to us on the date such forward-looking statements were made, no assurances can be given as to future results, levels of activity and achievements.

Undue reliance should not be placed on the statements contained herein, which are made as of the date hereof and, except as required by law, we undertake no obligation to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The forward-looking statements contained herein are expressly qualified by this cautionary statement.

AFRICA OIL CORP.

Notes to Consolidated Financial Statements
For the three months ended March 31, 2012 and 2011
(Expressed in United States dollars unless otherwise indicated)
(Unaudited)

1) Incorporation and nature of business:

Africa Oil Corp. (collectively with its subsidiaries, "AOC" or the "Company") was incorporated on March 29, 1993 under the laws of British Columbia and is an international oil and gas exploration company based in Canada with oil and gas interests in Kenya, Ethiopia, Puntland (Somalia) and Mali. The Company's registered address is Suite 2610, 1066 West Hastings Street Vancouver, BC, V6E 3X1.

AOC is an exploration stage enterprise that participates in oil and gas projects located in emerging markets, in sub-Saharan Africa. To date, AOC has not found proved reserves and is considered to be in the exploration stage. Oil and gas exploration, development and production activities in these emerging markets, are subject to significant uncertainties which may adversely affect the Company's operations. Uncertainties include, but are not limited to, the risk of war, terrorism, expropriation, nationalization or other title disputes, renegotiation or nullification of existing or future concessions and contracts, the imposition of international sanctions, a change in crude oil or natural gas pricing policies, a change in taxation policies, and the imposition of currency controls, in addition to the risks associated with exploration activities. These uncertainties, all of which are beyond the Company's control, could have a material adverse effect on AOC's business, prospects and results of operations. In addition, if legal disputes arise related to oil and gas concessions acquired by the Company, AOC could be subject to the jurisdiction of courts other than those of Canada. The Company's recourse may be very limited in the event of a breach by a government or government authority of an agreement governing a concession in which AOC has or may acquire an interest. The Company may require licenses or permits from various governmental authorities to carry out future exploration, development and production activities. There can be no assurance that AOC will be able to obtain all necessary licenses and permits when required.

2) Basis of preparation:

a) Statement of compliance:

The Company prepares these condensed consolidated financial statements in accordance with Canadian generally accepted accounting principles, specifically International Accounting Standard 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board ("IASB"). They are condensed as they do not include all the information required for full annual financial statements, and they should be read in conjunction with the consolidated financial statements for the year ended December 31, 2011.

The policies applied in these condensed consolidated financial statements are based on International Financial Reporting Standards ("IFRS") issued and outstanding as at May 28, 2012, the date the Board of Directors approved the statements.

b) Basis of measurement:

The consolidated financial statements have been prepared on the historical cost basis. Where there are assets and liabilities calculated on a different basis, this fact is disclosed in the Company's consolidated financial statements for the year ended December 31, 2011. Those accounting policies have been applied consistently to all periods presented in these consolidated financial statements.

AFRICA OIL CORP.

Notes to Consolidated Financial Statements
For the three months ended March 31, 2012 and 2011
(Expressed in United States dollars unless otherwise indicated)
(Unaudited)

c) Functional and presentation currency:

These consolidated financial statements are presented in United States (US) dollars. The functional currencies of all the Company's individual entities are US dollars which represents the currency of the primary economic environment in which the entities operate.

d) Use of estimates and judgments:

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Significant estimates and judgment used in the preparation of these consolidated financial statements are described in the Company's consolidated financial statements for the year ended December 31, 2011.

3) Acquisitions and divestitures:

a) Centric Energy Corp.

On February 23, 2011, the Company acquired all of the issued and outstanding commons shares of Centric Energy Corp. ("Centric") for total consideration of \$60.2 million. Centric was an oil and gas exploration company with operations in Kenya and the Republic of Mali. The consideration consisted of \$9,917 of cash and 30,155,524 common shares of the Company valued at CAD\$1.98 per share, being the trading price of the shares on the date the acquisition closed. The financial results of Centric's operations have been included in the Company's consolidated financial statements since the effective date.

The preliminary purchase price was allocated based on fair values as follows:

Net Assets acquired	
Cash and cash equivalents	\$ 748,877
Accounts receivable	135,886
Restricted cash	450,000
Property and equipment	8,823
Intangible exploration assets	58,831,524
Total net assets acquired	\$ 60,175,110

Consideration	
Shares issued	\$ 60,165,193
Cash issued	9,917
Total purchase price	\$ 60,175,110

AFRICA OIL CORP.

Notes to Consolidated Financial Statements
For the three months ended March 31, 2012 and 2011
(Expressed in United States dollars unless otherwise indicated)
(Unaudited)

b) Lion Energy Corp.

On June 20, 2011, the Company acquired all the issued and outstanding common shares of Lion Energy Corp. ("Lion") for total consideration of \$21.7 million. Lion was an oil and gas exploration company with operations in Kenya and Puntland (Somalia). The consideration consisted of 17,462,447 common shares of the Company. At the date of the acquisition Lion owned 2,500,000 shares of the Company, resulting in 14,962,447 net shares of the Company being issued valued at CAD\$1.41 per share, being the trading price of the shares on the date the acquisition closed. The Company also issued 287,250 stock options of the Company fair valued at CAD\$0.38 based on the Black Scholes option pricing model and assumed 2,289,000 outstanding Lion warrants. The warrants were amended to acquire AOC shares at CAD\$2.50. No value was attributed to the amended Lion warrants which all expired out of the money shortly after the acquisition. The preliminary purchase price was allocated based on fair values as follows:

Net Assets Acquired	
Cash	\$ 17,897,909
Accounts receivable	3,426,216
Marketable securities	2,453,250
Intangible exploration assets	5,681,000
Accounts payable and accrued liabilities	(3,643,533)
Total net assets acquired	\$ 25,814,842
Consideration	
Shares issued, net of AOC shares acquired	21,561,185
Share options issued	110,606
Total consideration	\$ 21,671,791
Gain on acquisition	\$ 4,143,051

The marketable securities acquired were 10 million shares in Encanto Potash Corp. ("Encanto") which trades the TSX Venture Exchange. These securities are stated at fair value with gains or losses on revaluation recorded on the statement of net loss and comprehensive loss. All of the Encanto shares acquired were sold during the three months ended March 31, 2012.

c) Horn Petroleum Corporation ("Horn")

On September 20 2011, the Company transferred ownership of its wholly owned subsidiary, Canmex Holdings (Bermuda) I Ltd. ("Canmex"), the entity which indirectly owns a 60% interest in Production Sharing Agreements with the Puntland State of Somalia, in return for 27,777,778 shares in Horn (formerly Denovo Capital Corp.) (the "Transaction").

Prior to close of the Transaction, Horn completed a consolidation of its issued and outstanding common shares on the basis of 0.65 new common shares for each existing common share. Horn also completed a non-brokered private placement of an aggregate of 45,535,195 subscription receipts at a price of CAD\$0.90 per subscription receipt for gross proceeds of \$41.3 million. AOC acquired 11,111,111 of the subscription receipts. The subscription receipts were converted into common shares and warrants of Horn on September 20, 2011. In connection with the private placement, Horn paid a finder's fee, consisting of the issuance of an

AFRICA OIL CORP.

Notes to Consolidated Financial Statements
For the three months ended March 31, 2012 and 2011
(Expressed in United States dollars unless otherwise indicated)
(Unaudited)

aggregate of 812,417 common shares and the payment of \$0.9 million in cash. All securities issued pursuant to the offering were subject to a statutory hold period which expired December 3, 2011.

Subsequent to the Transaction, AOC held 51.4% of the outstanding shares of Horn, as well, a management services arrangement has been agreed between Horn and AOC in which the management of AOC are responsible for the operating decisions of Horn. As such, the former shareholder of Canmex, AOC, is deemed to control Horn.

In accordance with IFRS, changes in a parent's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. In such circumstances, the carrying amounts of the controlling and non-controlling interests shall be adjusted to reflect the changes in their relative interests in the subsidiary. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received shall be recognized directly in equity and attributed to the owners of the parent. The following table outlines the consideration received versus the non-controlling interest adjustment:

Net consideration received	
Cash, net of cash issued	\$ 29,923,128
Accounts payable and accrued liabilities	(179,179)
Warrant liability	(7,787,410)
	<hr/>
	\$ 21,956,539
	<hr/>
Non-controlling interest adjusted	34,604,620
	<hr/>
	\$ (12,648,081)
	<hr/>

The total difference by which the non-controlling interests are adjusted and the fair value of the consideration received was \$12.6 million of which \$4.6 million is recognized as a dilution loss in the statement of net loss and comprehensive loss on the consolidation of Horn and \$8.1 million was recognized as a dilution loss through equity during the three months ended September 30, 2011.

4) Restricted cash:

At March 31, 2012, the Company has a restricted cash balance of \$1,644,000 (December 31, 2011 - \$2,919,000) which represents the following bank deposits securing outstanding letters of credit:

Block	In favor of	March 31, 2012	December 31, 2011

		<hr/>	<hr/>
		\$ 1,644,000	\$ 2,919,000

AFRICA OIL CORP.

Notes to Consolidated Financial Statements
For the three months ended March 31, 2012 and 2011
(Expressed in United States dollars unless otherwise indicated)
(Unaudited)

5) Property and equipment:

	March 31, 2012	December 31, 2011
Cost, beginning of period	\$ 214,868	\$ 166,599
Additions	63,552	39,446
Business acquisitions (note 3(a))	-	8,823
Cost, end of period	278,420	214,868
Accumulated depreciation, beginning of period	(175,473)	(126,978)
Depreciation	(11,906)	(48,495)
Accumulated depreciation, end of period	(187,379)	(175,473)
Net carrying amount, beginning of period	\$ 39,395	\$ 39,621
Net carrying amount, end of period	\$ 91,041	\$ 39,395

As at March 31, 2012, the Company has recorded \$91,041 of property and equipment (December 31, 2011 - \$39,395) consisting primarily of office and computer equipment. The Company depreciates its property and equipment on a straight line basis over the useful life of the assets (one to three years). During the three months ended March 31, 2012, AOC recorded depreciation expense of \$11,906 (three months ended March 31, 2011 - \$14,119). The Company has reviewed property and equipment and determined that there is no indication of impairment.

6) Intangible exploration assets:

	March 31, 2012	December 31, 2011
Net carrying amount, beginning of period	\$ 185,671,962	\$ 96,468,816
Additions, net	21,895,648	41,285,520
Impairment of Intangible exploration assets	(3,114,858)	(6,969,413)
Farmout proceeds, net	-	(9,625,485)
Business acquisitions (note 3)	-	64,512,524
Net carrying amount, end of period	\$ 204,452,752	\$ 185,671,962

As at March 31, 2012, \$204.5 million of exploration expenditures have been capitalized as intangible exploration assets (December 31, 2011 - \$185.7 million). These expenditures relate to the Company's share of exploration projects which are pending the determination of proven and probable petroleum reserves, and include geological and geophysical expenditures, exploratory drilling expenditures, costs required under the Company's Productions Sharing Agreements with the respective governments, and general and administrative costs related to exploration activities. At March 31, 2012, no intangible exploration assets have been transferred to oil and gas interests as commercial reserves have not been established and technical feasibility for extraction has not been demonstrated.

During the three months ended March 31, 2012, the Company capitalized \$1.2 million of general and administrative expenses related to intangible exploration assets (three months ended March 31, 2011 - \$0.1 million). During the three months ended March 31, 2012, the Company capitalized nil interest expense in relation to its convertible debt to intangible exploration assets (three months ended March 31, 2011 - \$0.2 million).

AFRICA OIL CORP.

Notes to Consolidated Financial Statements

 (Expressed in United States dollars unless otherwise indicated)
 (Unaudited)

During the three months ended March 31, 2012, management identified indicators of impairment for intangible exploration assets of Mali. As a result of the assessment of these impairment indicators, the Company has written-off \$3.1M of capitalized intangible exploration assets. The remaining carrying value of the Mali intangible exploration assets is nil.

During 2011, management relinquished Blocks 2/6 in Ethiopia. Accordingly, the Company has written-off \$7.0 million of capitalized intangible exploration assets of which \$1.2 million represents the Company's portion of settlement costs with the Government of Ethiopia related to unfulfilled work obligations on the block.

Although the Company believes that it has title to its oil and natural gas properties, it cannot control or completely protect itself against the risk of title disputes or challenges.

7) Share capital:

a) The Company is authorized to issue an unlimited number of common shares with no par value.

b) Issued:

c) In June of 2011, the Company acquired 2.5 million of its own shares through the purchase of Lion Energy (see note 3(b)). The total amount paid to acquire the shares was deducted from share capital. The shares were held as treasury shares until they were surrendered for cancellation, and returned to treasury on December 15, 2011. No consideration was paid to AOC in connection with the cancellation and return to treasury. No gain or loss is recognized in the consolidated statement of net income (loss) and comprehensive income (loss) on the purchase, sale, issue or cancellation of the Company's own equity shares.

Balance, March 31, 2012:		-	\$ -

At March 31, 2012, the Company also recorded \$23.6 million (December 31, 2011 - \$2.9 million) in long-term warrant liability on consolidation of its 51.3% owned subsidiary Horn.

- a) On November 22, 2010, the Company elected to accelerate the expiry date for all outstanding warrants issued as part of the April 28, 2009 private placement. The expiry date with respect to these warrants was amended to December 23, 2010. Of the 37,421,018 warrants granted in April 2009, all of which were outstanding at the beginning of 2010, 37,220,365 were exercised and 161,153 expired unexercised. The expiry for the remaining 39,500 warrants was extended to March 23, 2011. As a result of warrants exercised in 2010, the Company issued 37,220,365 common shares, realizing net proceeds of \$55.2 million. The fair value of warrants transferred to share capital was \$18.4 million. In the first quarter of 2011, 30,000 of the remaining warrants were exercised and 9,500 expired unexercised. As a result of warrants exercised in the first quarter of 2011, the Company issued 30,000 common shares, realizing net proceeds of \$46,242. The fair value of warrants transferred to share capital was \$15,389.
- On November 22, 2010, the Company elected to accelerate the expiry date for 1,500,000 warrants issued to Platform as consideration for the assignment of blocks 12A and 13T (note 7(b)). The expiry date with respect to these warrants was amended to May 22, 2011. On April 20, 2011 all outstanding warrants held by Platform were exercised. As a result of the warrants being exercised the Company issued 1,500,000 common shares, realizing net proceeds of \$2,362,500. The fair value of warrants transferred to share capital was \$598,500.
- b) On March 12, 2012 all the Company's remaining outstanding warrants were exercised. As a result of the warrants being exercised the Company issued 6,521,601 common shares, realizing net proceeds of \$9,876,313. The fair value of warrants transferred to share capital was \$4,463,514.

9) Share purchase options:

At the 2010 Annual General Meeting, held on May 27, 2010, the Company approved the stock option plan (“the Plan”) which was last amended at the 2008 Annual General Meeting. The Plan provides that an aggregate number of common shares which may be reserved for issuance as incentive stock options shall not exceed 10% of the common shares outstanding, and option exercise prices will reflect current trading values of the Company’s shares. The term of any option granted under the Plan will be fixed by the Board of Directors and may not exceed five years from the date of grant. Vesting periods are determined by the Board of Directors and no optionee shall be entitled to a grant of more than 5% of the Company’s outstanding issued shares.

The Company’s share purchase options outstanding are as follows:

	March 31, 2012		December 31, 2011	
	Number of shares	Weighted average exercise price (CAD\$)	Number of shares	Weighted average exercise price (CAD\$)
Outstanding, beginning of period	10,830,668	1.54	3,946,667	1.67
Granted	35,000	2.09	8,112,250	1.70
Expired or cancelled	(112,334)	1.71	(722,667)	4.30
Exercised	(729,832)	1.23	(505,582)	1.16
Balance, end of period	10,023,502	1.55	10,830,668	1.54

The fair value of each option granted is estimated on the date of grant using the Black-Scholes options pricing model. The fair value of each option granted by the Company during the three months ended March 31, 2012 and the year ended December 31, 2011 were estimated on the date of grant using the Black-Scholes options pricing model with the following weighted average assumptions:

	2012	2011
Number of options granted during the year	35,000	8,112,250
Fair value of options granted (\$ per option)	0.74	0.66
Risk-free interest rate (%)	1.12	1.33
Expected life (years)	2.17	2.17
Expected volatility (%)	58	68
Expected dividend yield	-	-

10) Segment information:

The Company determines and presents operating segments based on the information that internally is provided to the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), who are the Company's chief operating decision makers. An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses. An operating segment's operating results, for which discrete financial information is available, are reviewed regularly by the CEO and CFO to make decisions about resources to be allocated to the segment and assess its performance. The Company has a single class of business which is international oil and gas exploration. The geographical areas are defined by the Company as operating segments in accordance with IFRS. The Company currently operates in a number of geographical areas based on location of operations, being Puntland (Somalia), Ethiopia, Kenya and Mali.

12) Related party transactions:

a) Transactions with Lorito Holdings (Guernsey) Limited ("Lorito")

During May 2009, the Company's loans payable due to Lorito in the amount of CAD\$6,000,000 plus interest of \$195,521 was converted to 6,521,601 Units of the Company on the basis of CAD\$0.95 per Unit. Each Unit was comprised of one common share and one share purchase warrant. Each warrant was exercisable into one common share of AOC at a price of CAD\$1.50 per share over a period of three years. In the event that AOC closed at or above CAD\$2.00 for a period of 20 consecutive trading days, the Company may have elected to accelerate the expiry date to 30 days from the date of written notice to the warrant holder. Lorito is

AFRICA OIL CORP.

(Expressed in United States dollars)
(Unaudited)

beneficially owned by Ellegrove Capital Ltd., a private trust the settler of which is the late Adolf H. Lundin. During the three months ended March 31, 2012, Lorito exercised each of its 6,521,601 warrants into a common share of the Company.

b) Transactions with Namdo Management Services Ltd (“Namdo”)

During the three months ended March 31, 2012, the Company incurred management fees of \$64,164 (three months ended March 31, 2011- \$64,122) for administrative support services fees to Namdo. Namdo is a private corporation owned by Lukas H. Lundin. At March 31, 2012, the Company had no outstanding amounts due to Namdo in respect of management fees (December 31, 2011 – Nil).

c) Transactions with Horn Petroleum Corp. (“Horn”)

On September 20, 2011, a Share Purchase Agreement was executed between the Company and Horn. AOC owns 51.3% of the outstanding shares of Horn. The following transactions and resulting intercompany balances outstanding between the Company and Horn have been eliminated as the Company fully consolidates the financial statements of Horn.

Under the terms of a General Management and Service Agreement between Horn and the Company for the provision of management and administrative services, the Company invoiced Horn \$224,423 during three months ended March 31, 2012 (three months ended March 31, 2011 – Nil). At March 31, 2012, the outstanding balance receivable from Horn, recorded as a due from related party, was nil (December 31, 2011 – \$258,116). The management fee charged to Horn by the Company is expected to cover the cost of administrative expense and salary costs paid by the Company in respect services provided to Horn.

Under the terms of a Services Agreement between the Company and Horn, AOC invoiced Horn \$63,246 during the three months ended March 31, 2012 (three months ended March 31, 2011 – 76,398) for services provided by geologists and geophysicists employed by AOC. At March 31, 2012, \$24,936 was outstanding and recorded in due from related party (December 31, 2011 – \$11,650).

During the three months ended March 31, 2012, AOC invoiced Horn \$108,032 for reimbursable expenses paid by AOC on behalf of Horn (three months ended March 31, 2011 – 136,305). At March 31, 2012, \$49,951 was outstanding and recorded in due from related party (December 31, 2011 – \$109,269).

During December 2011, Horn’s subsidiary Canmex Holdings (Bermuda) II Ltd. commenced the transfer of \$1.5 million to Horn, via AOC. At December 31, 2011, the funds were on deposit with AOC. Accordingly, the balance had been recorded as due to related party. During the quarter, AOC transferred the funds to Horn.

13) Subsidiaries:

The Company has the following wholly owned subsidiaries; 0845379 B.C. Ltd. (British Columbia), Africa Oil Holdings Cooperatief U.A. (Netherlands), Africa Oil Turkana B.V. (Netherlands), Africa Oil Kenya B.V. (Netherlands), Africa Oil Ethiopia B.V (Netherlands), Africa Oil Turkana Ltd. (Kenya), 0903658 B.C. Ltd. (British Columbia), Centric Energy Holdings (Barbados) Inc. (Barbados), Centric Energy Kenya (Barbados) Inc. (Barbados), Centric Energy (Kenya) Ltd. (Kenya), Mali Oil Development SARL (Mali, West Africa), Lion Energy Antilles N.V. (Curacao). The Company owns 51.3% of the issued and outstanding shares of Horn Petroleum
